

Town Manager Report - January 2022

Well, 2022 started out a little rough. I was hospitalized for almost a week and out of the office for most of this month. However, I was able to still manage the Town's urgent needs from home. I wish to thank the Town Clerk for handling the Town meetings and my public works staff for stepping up and making sure the Town's infrastructure and emergencies were handled. I appreciate the get well calls, messages and cards I received from everyone.

The public works staff assisted PRC in taking down the Christmas banners.

Preparation for the museum grand opening in February continued with the installation of a new door canopy and a handicap parking sign and marked parking spot.

The public works staff also started trimming the palm trees on Poling Blvd. This project should be done by the end of the month.

A collapsed storm drain was repaired on Morton Street.

All the town mowers have been fully serviced this month, by the staff. This includes oil and fluid changes, new blades and belts. This way we have all of the mowers ready to go for the spring mowing.

One of the car wash lift station pumps had to be pulled and sent out to be repaired. Again, there was a major clog with wipes still being flushed down the lines. The pump ran hot and had to be pulled and unclogged. This pump is not quite a year old and thankfully is still under warranty.

Again, I appreciate the support the Town Council has once again provided to me.
