

Town Manager Report - October 2023

The front office staff completed all the new files, quarterly and end of the year reporting. In addition, the Florida Municipal Insurance Trust (FMIT) who handles all of the Town's various insurance(s) came and did a complete asset survey to make sure all of the renovations done have been assessed and important assets are listed and covered properly.

The public works staff have been working with Florida Rural Water Association (FRWA) to install equipment as a demo program, to provide monitoring of the water tower and the lift stations remotely, from the Town's cellphones.

The Town Hall has completed the update of all of its phone lines and internet services with Blue Stream Fiber. This should provide better service and save the Town money. Vector Security, who handles the Town's security videos had to come out and update the camera system with the new fiber optic lines that were put in place by Blue Stream Fiber.

I have attended all of the Town's required meetings for this month.
